VISHAL YADAV

Senior Backend Engineer | Generative AI | Serverless/Microservices Architecture | Cloud (AWS / Azure)

+91-8576008579 • vishalyadav7171@gmail.com • linkedin.com/in/vishalyadav0001 • vishal-portfolio-neon.vercel.app

PROFESSIONAL SUMMARY

Backend Engineer with 6+ years of experience designing scalable serverless architectures and AI-powered systems on AWS and Azure. At Arm Holdings, built and deployed production-grade Retrieval-Augmented Generation (RAG) pipelines, serverless microservices (AWS Lambda, API Gateway, S3, RDS), and LLM-integrated backend services using Node.js and TypeScript. Independently built a GenAI personal portfolio featuring a RAG-based chatbot that answers questions about me in real time. Deep expertise in cloud-native backend development, prompt engineering, vector search, and payment integrations.

TECHNICAL SKILLS

Languages & Frameworks: Node.js, TypeScript, JavaScript, Express.js

Generative AI / LLM: RAG (Retrieval-Augmented Generation), Azure OpenAI, GPT-4 / GPT-3.5, Prompt Engineering, Vector Embeddings, Semantic Search, Document Chunking, LangChain (concepts)

Cloud & Serverless (AWS): AWS Lambda, API Gateway, S3, RDS, DynamoDB, Firebase, SAP BTP, Azure AI Services

Databases: PostgreSQL, MongoDB, SQL Server, DynamoDB

APIs & Architecture: REST, GraphQL, Microservices, Event-Driven Architecture

Payments & Integrations: Stripe, Razorpay, PayPal, Twilio, Web3 / Blockchain

DevOps & Tools: Git, Bitbucket, CI/CD Pipelines, Agile / Scrum

PERSONAL PROJECTS

GenAI Personal Portfolio with RAG Chatbot • *Self-initiated* • *2026–Present*

vishal-portfolio-neon.vercel.app

- Independently designed and deployed a full-stack AI-powered portfolio hosted on Vercel.
- Built a RAG-based chatbot from scratch that answers recruiter and visitor queries about my background, skills, and projects in real time.
- Implemented document embedding pipeline, vector similarity search, and LLM response generation using Azure OpenAI / GPT models.
- Demonstrates end-to-end ownership of GenAI product: from chunking & vectorization to API design and frontend integration.

PROFESSIONAL EXPERIENCE

Innovify (Client: Arm Holdings) | Software Engineer – Backend & GenAI *Feb 2025 – Present*

Serverless Backend Services

- Architected and deployed production serverless microservices on AWS Lambda, API Gateway, S3, and RDS powering Arm's enterprise backend workflows.
- Designed event-driven, scalable backend APIs in Node.js and TypeScript for automated decision-making and data processing pipelines at scale.
- Built AI-powered prediction scoring microservice using GPT models integrated into Arm's internal tooling for automated decision workflows.
- Integrated Azure AI services and multiple LLM APIs to add intelligence to backend services beyond chatbot use cases.

RAG System for Enterprise Knowledge Retrieval

- Designed and implemented a full Retrieval-Augmented Generation (RAG) pipeline for Arm Holdings enabling contextual, accurate enterprise knowledge retrieval.
- Integrated Azure OpenAI models for context-aware response generation across large internal document repositories.
- Built document chunking, embedding generation, and vector similarity search pipelines to maximize answer accuracy and relevance.
- Developed Node.js orchestration APIs connecting the embedding layer, vector store, document retrieval, and LLM response generation end-to-end.

Kratin Software Solutions (Client: Lunajoy Health) | **Technologist – Backend Engineer** *Apr 2024 – Feb 2025*

- Led end-to-end backend development of Lunajoy Health's appointment booking platform, improving booking efficiency by 30%.
- Deployed and optimized serverless functions on AWS Lambda; managed patient records on Amazon RDS + PostgreSQL, reducing data retrieval time by 25%.
- Integrated MongoDB for large-scale data storage, improving database flexibility and performance.
- Implemented HIPAA-compliant PDF viewer for medical reports and insurance cards.
- Delivered Stripe tokenization and payment gateway integration, increasing successful payment completion rates by 20%.

Mobiloitte Technology Pvt Ltd | **Technology Lead – Node.js** *Oct 2023 – Apr 2024*

- Led backend team, handled task allocation, architecture decisions, and conflict resolution.
- Delivered HOVR NFT Marketplace (Node.js + Web3 + Stripe), Restaurant App (PayPal), Thabo Event Management, and a Crypto E-wallet.
- Built real-time social media sync service and scalable backend foundations for multiple concurrent client projects.

SPC Games | **Sr. Software Developer** *Aug 2023 – Oct 2023*

- Developed automated daily database backup system using JavaScript.
- Built game rules and report generation APIs for Ludo game using Node.js and TypeScript.

Mckinsol Consulting Inc. | **Sr. Software Developer** *Feb 2020 – Aug 2023*

- Designed and developed backend APIs in Node.js and PHP; deployed on BTP Cloud, DigitalOcean, and Firebase.
- Integrated Razorpay payment gateway across multiple e-commerce applications.
- Delivered projects for Under Armour, GXP, and PVH; built HR Portal, SAP Request Management, SpotYourDeal, and SmileADay crowdfunding platform.

CERTIFICATIONS

- IBM – What is Data Science (Coursera)
- IBM – Data Analysis with Python (Coursera)

CORE COMPETENCIES

Serverless Architecture • Generative AI / RAG Systems • Cloud-Native Backend (AWS / Azure) • LLM Integration • API Design & Microservices • Vector Search & Embeddings • Team Leadership • Agile Development
